

HE120

Whole-House Drum Humidifier

Honeywell

The Honeywell HE120 Whole-house Drum Humidifier is perfect for homes where no drain is close to the furnace. Adding moisture to dry air in the home is an absolute necessity for improved comfort and indoor air quality. A proper moisture level in your home will help reduce dry skin and protect woodwork, hardwood floors and other household furnishings. And, the HE120 Whole-house Humidifier does it all while using a minimal amount of water, so you'll enjoy a more comfortable home while saving on your water bill.

HE120 Whole-House Drum Humidifier

PROPER HUMIDITY WITHOUT A DRAIN ON YOUR WATER BILL.

Easy To Use — Just set the dial with the humidity setting chart, and the unit adjusts to work with your heating system.

Full Coverage — Capable of humidifying homes up to 2,000 square feet.

No Drain Required — Helps reduce water bills and simplifies installation.

Up to 17 Gallons of Water — Evaporated into the home per day.

Energy Savings — Because humidified air feels warmer than dry air, you can keep your thermostat turned down a few degrees and still feel comfortable.

Peace of Mind — Moisturized air helps to prevent dryness and protect woodwork and furnishings throughout your home.

Simple Maintenance — Replacement humidifier pads can be purchased and/or installed by your heating and cooling professional.

Snap-Lock Cover — Allows for quick, easy maintenance.

Part Numbers	Gallons Per Day	Replacement Pad	Average Replacement
HE120A1002	17	HC12A1015	6 months*

*Annual six-month humidification season per year. Actual filter life depends on the quality of the water used and the amount of humidification required.
