

QwikLug® Compressor Terminal Repair Kits

Mainstream's patented product, **QwikLug®**, easily attaches to damaged or corroded terminals. **QwikLug®** has color-coded leads to connect to existing wiring. The outer connector housing is a nylon insulator, eliminating the potential for shorting. *It's that easy!*

- ▶ Enables tight clean connections to damaged or corroded terminals
- ▶ Fits all standard compressor terminals
- ▶ Easily tightens from the front
- ▶ Optional set screws for tight installations
- ▶ Provides a durable brass connection, tested for more than 100,000 compressor starts
- ▶ Fully insulated brass connector
- ▶ Available with 10 AWG or 12 AWG leads in 2' or 4' lengths
- ▶ 2' leads have been pre-stripped at the wire connection end
- ▶ 4' leads have fully insulated female connectors for connection directly to the contactor

Finally... a Quick & Simple Method to Repair Compressor Terminals!

QwikLug®
Depth-Set
Instructions
CAUTION!
Slide QwikLug®
over metal.
NOT
over insulator.

Optional Set Screws

When installing QwikLug® where space is restricted, simply replace phillips head screws with optional set screws.

Directions for use:

1. Clean the damaged or corroded terminals.
2. Push the **QwikLug®** connector onto the terminal.
3. Tighten from the front.
